our services

WE ALL HAVE AGILITY,
THE DIFFERENCE IS
HOW WE UTILISE IT.

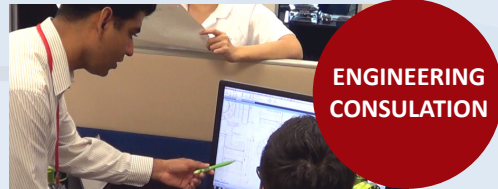

DESIGN ENGINEERING

At NuStar Technologies, we do not just design to meet the project requirement, we strive to provide innovative solutions and enhance the performance of every project we undertake.

PROJECT MANAGEMENT

With our experienced and well-trained personnel managing your projects, you are assured your projects are in good hands.

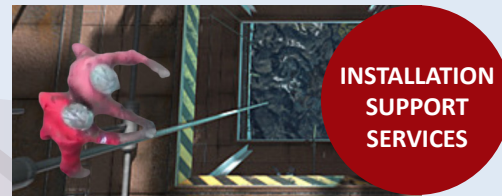

ENGINEERING CONSULTATION

Our consultation services include Front End Engineering Studies and Inspection services.

TESTING & ASSEMBLY

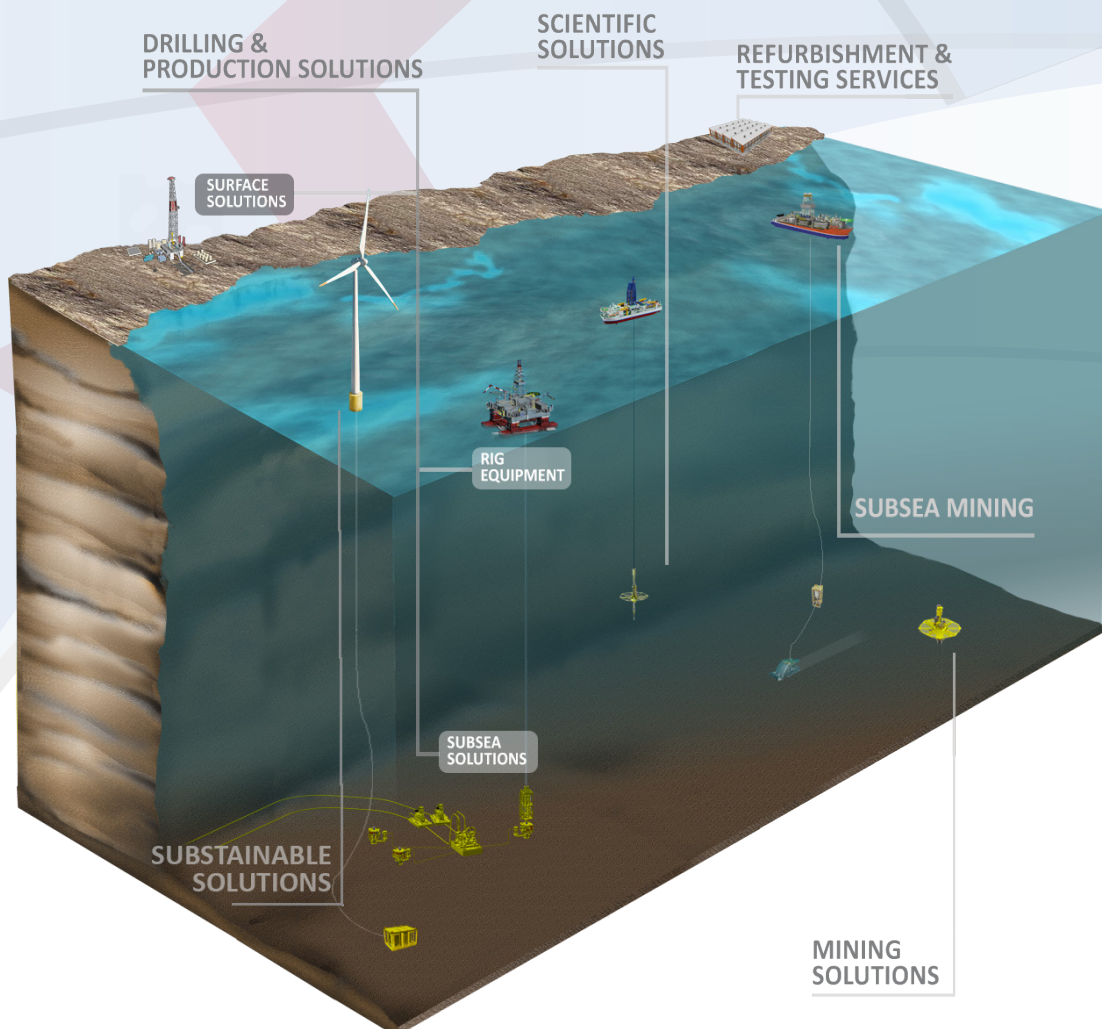

NuStar Test Facility is commissioned as a test and assembly centre for our company's as well as customers' equipment.

INSTALLATION SUPPORT SERVICES

Our team possess in-depth knowledge and experience to perform installations efficiently, complying with all industry requirements and standards.

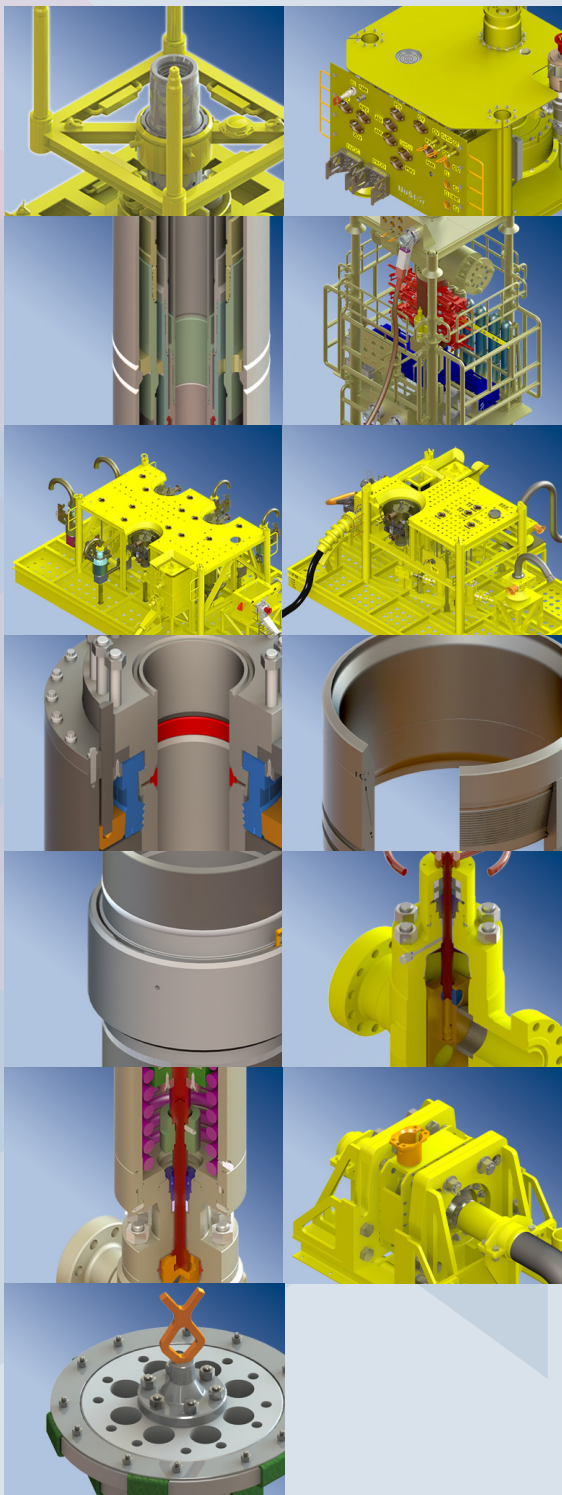

OUR SOLUTIONS

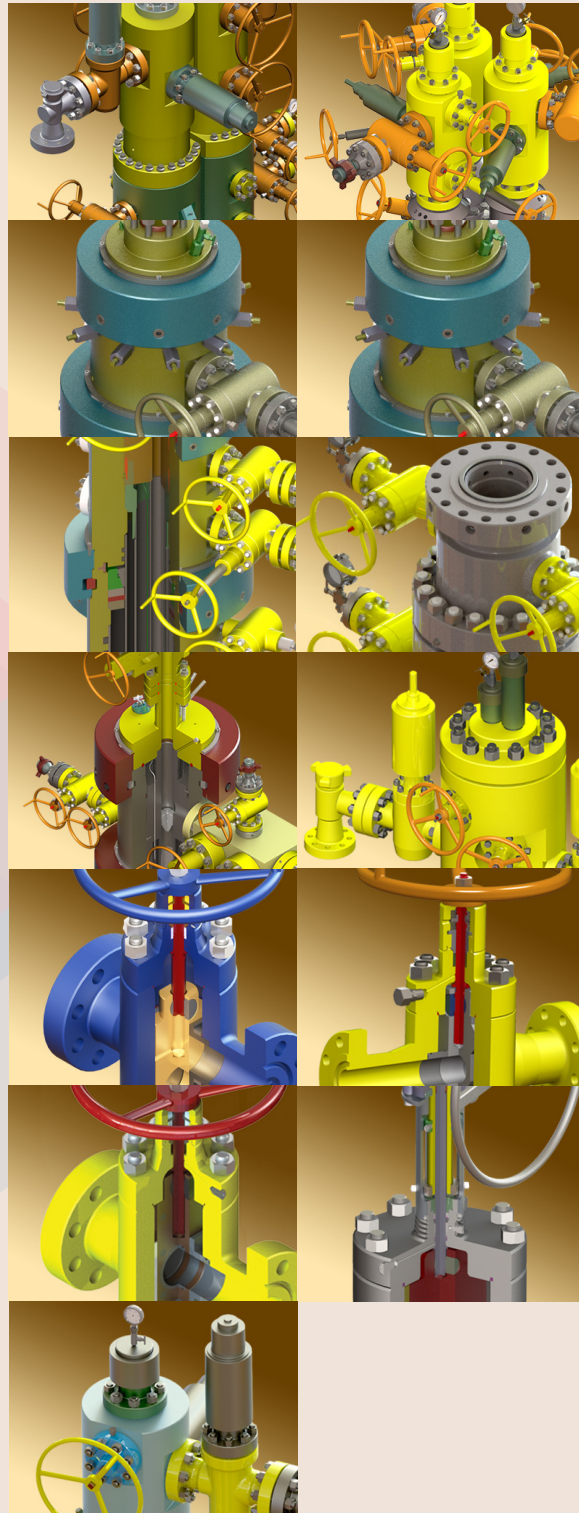

our solution

DRILLING & PRODUCTION SOLUTIONS

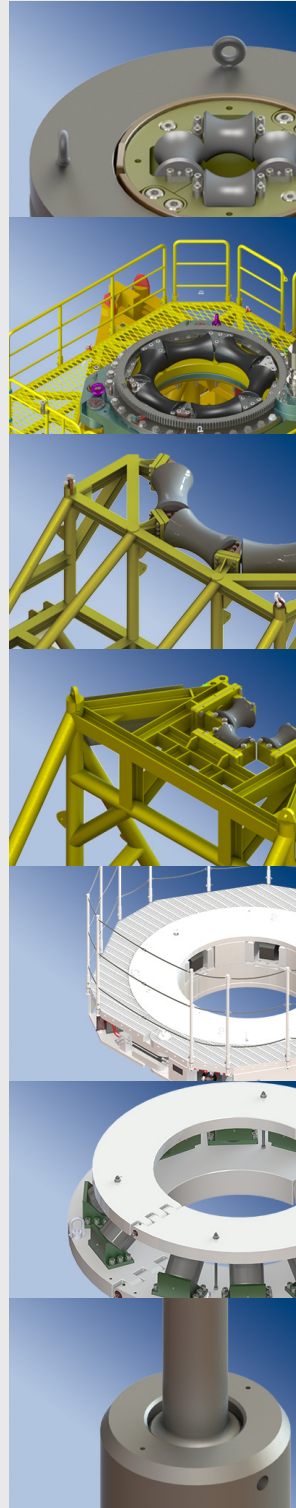

SUBSEA

SURFACE

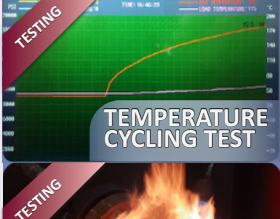

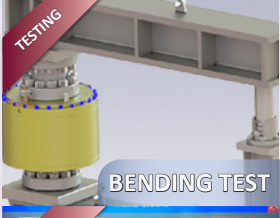

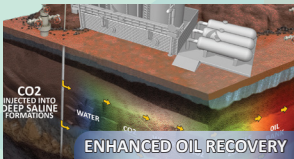

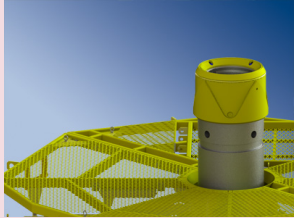

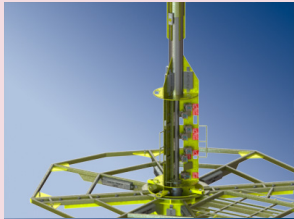

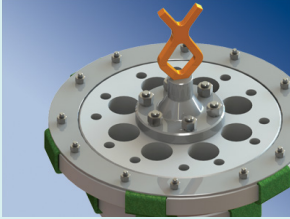

RIG EQUIPMENT

TRUE INNOVATION COMES FROM
PERPENDICULAR THINKING.

We offer a wide range of refurbishment and testing services to ensure performance and industry compliance.

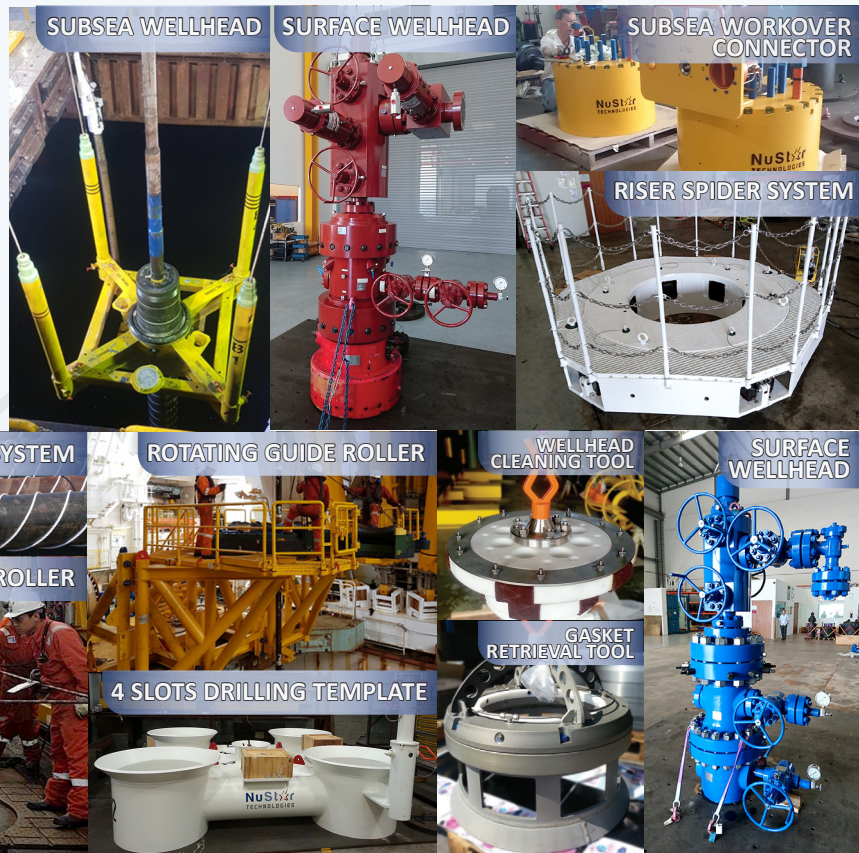

our projects

Whether it is Onshore or Offshore Operations, we offer innovative, effective and practical engineering solutions to meet project requirements.

DRILLING & PRODUCTION

SUBSEA • SURFACE • RIG EQUIPMENT

NuStar Technologies has designed and manufactured a wide range of equipment used in the field involving Subsea, Surface and on board Rig. These equipment have been deployed in many projects across the region.

SCIENTIFIC & MINING

Working closely with scientific research and mining companies, NuStar Technologies has designed, manufactured and installed these equipment that assisted in the study and extraction of the required content for further research and usage.

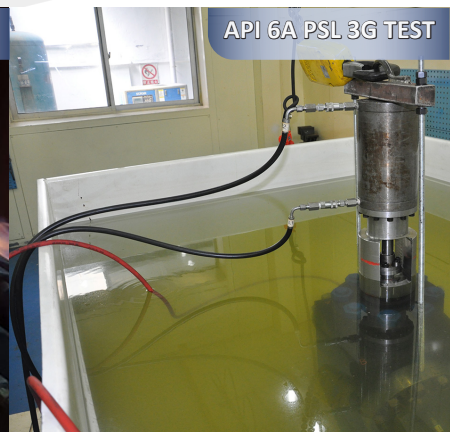

QUALIFICATION & TESTING

Our Testing & Assembly facilities handle the company's internal and external projects. Our team of well-trained professionals undertake different types of tests to ensure compliance, meeting customers' requirement and industry standard.
